

**PROPOSED DEVELOPMENT AT**

**P-1606 COOKSTOWN CROSS, FOURTH AVENUE**

**INDICATION OF TIMELINES AND PHASING FOR WATER DEMAND AND WASTEWATER COLLECTION**

Wastewater connections are proposed on completion of the external works package. However, no wastewater will be generated until fit out commences.

This is expected to be minimal for the purposes of testing etc. The full waste water flow will be on completion.

Water demand is anticipated on completion of project; however, a connection will be formed during the construction phase with water usage expected during fit out.
